

Geremie Ishimwe

Full-Stack Software Developer

Cape Town, South Africa | Developer & BIS Student | Class Representative

PROFESSIONAL SUMMARY

A detail-oriented and adaptable Full-Stack Developer currently advancing through a Business Information Systems degree. Passionate about designing and deploying Progressive Web Apps (PWAs) that solve real business needs. Combines strong technical skills in Python, Flask, and JavaScript with proven leadership abilities to bridge the gap between complex software systems and user requirements.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, HTML, CSS
Frameworks & Tools:	Flask, Bootstrap 5, Visual Studio Code
Databases:	SQLite
Core Concepts:	Progressive Web Apps (PWAs), Systems Analysis, Requirements Gathering, Feasibility Studies, Full-Stack Development

SOFTWARE PROJECTS & HACKATHONS

RainTrack	Apr 2026 – May 2026
------------------	---------------------

Progressive Web App (PWA)

- Developed and deployed a multi-phase rainfall logging application, successfully converting a standard web app into a robust PWA.
- Engineered offline capabilities and persistent data storage utilizing Python, Flask, and SQLite.
- Implemented dynamic, interactive data visualizations using JavaScript chart handling.

Bed.Inc Inventory Control	May 2026
----------------------------------	----------

Full-Stack Web Application

- Built a comprehensive stock management system utilizing Python, Flask, Bootstrap 5, and SQLite.
- Implemented dynamic features including secure photo uploads and real-time inventory tracking for a business IT assignment.

Uvuyo Mart SmartMart AI System

Apr 2026

Systems Analysis & Design

- Authored a comprehensive User Requirements Document (URD) focusing on thorough requirement gathering and system design principles.
- Conducted a rigorous feasibility study, scoring technical and operational viability for an AI-driven retail system.

AI Business Solutions Hackathon

May 2026

24-Hour Prototyping Competition

- Participated in an intensive 24-hour hackathon focused on developing artificial intelligence solutions to address real business needs.

EXPERIENCE & LEADERSHIP

Class Representative

2026 – Present

STADIO Higher Education

- Serve as the primary liaison for second-year Business Information Systems students, facilitating communication between students and faculty.
- Design, distribute, and compile comprehensive student feedback mechanisms regarding curriculum delivery and module lecturers (including WST262 and BAT262).

Event Coordinator & Brand Activator

Mar 2026 – Present

Promotional Events Company

- Execute large-scale university orientation activities, managing logistics and distributing resources to first-year students.
- Communicate effectively with diverse student demographics in fast-paced event environments.

EDUCATION

Bachelor of Commerce in Business Information Systems

Expected Graduation: 2027

STADIO Higher Education, South Africa

Second-year student excelling in web development, business analysis, and information systems design.
